Marisol Acosta, MEd. LPC-S, is the Texas Children Recovering from Trauma Initiative project director for the National Child Traumatic Stress Network and the Health and Human Services Commission of Texas in the Behavioral Health Services Department. As a trauma subject matter expert, she directs trauma informed care organizational transformation pilots for all community behavioral health services. Acosta holds a masters in counseling from the University of Houston and a graduate certificate from Harvard University and the Italy Ministry of Health on Global Mental Health: Trauma and Recovery, and is a licensed professional counselor in Texas. Her work has focused especially on children and adolescents, survivors of mass conflicts, refugees, unaccompanied minors, human trafficking, and survivors of torture, sexual abuse and domestic violence.

Kay Chiodo has more than 30 years of experience in providing and developing communication solutions for people with sensory disabilities. She serves as chief executive officer of Services by Vital Signs, Inc. and Deaf Link both which she founded. Vital Signs is one of the oldest and largest American Sign Language interpreting agencies in Texas. Deaf Link developed and provides services to assist local, state and federal agencies in complying with the Americans with Disabilities Act as it relates to people with sensory disabilities. In 2005, Deaf Link launched the first and only accessible emergency-alerting system designed to meet the communication needs for persons with sensory disabilities.

Dennis Andrulis, Ph.D., has more than 30 years of experience in health care research and policy focusing on vulnerable populations, their providers and their communities. As a University of Texas School of Public Health associate professor and with an affiliation with the Texas Health Institute, his work has led to advance health equity for racially and ethnically diverse and other vulnerable populations in three major areas: implementation of the Affordable Care Act and its equity implications related to the health care workforce, marketplaces, safety net, public health and prevention, and quality health care; prompting policies and building community resilience to the consequences of climate change; and working with community based organizations to build accountable care communities.

Michelle A. Meyer, Ph.D., a Louisiana State University assistant professor, is a Next Generation of Hazard and Disasters Researchers Fellow and an Early-Career Research Fellow with the Gulf Research Program 2016. Her research interests include environmental sociology and community sustainability, disaster resilience and mitigation, climate change displacement, environmental justice, and the interplay between environmental conditions and social vulnerability. Meyer has worked on multiple projects including analyzing governmental and nonprofit networks in long-term recovery; assessing variation in use of social media by population groups during disasters; and assessing earthquake protective action messaging in Haiti.
