# Preparedness Update

*Helping to prepare the Texas emergency management community*

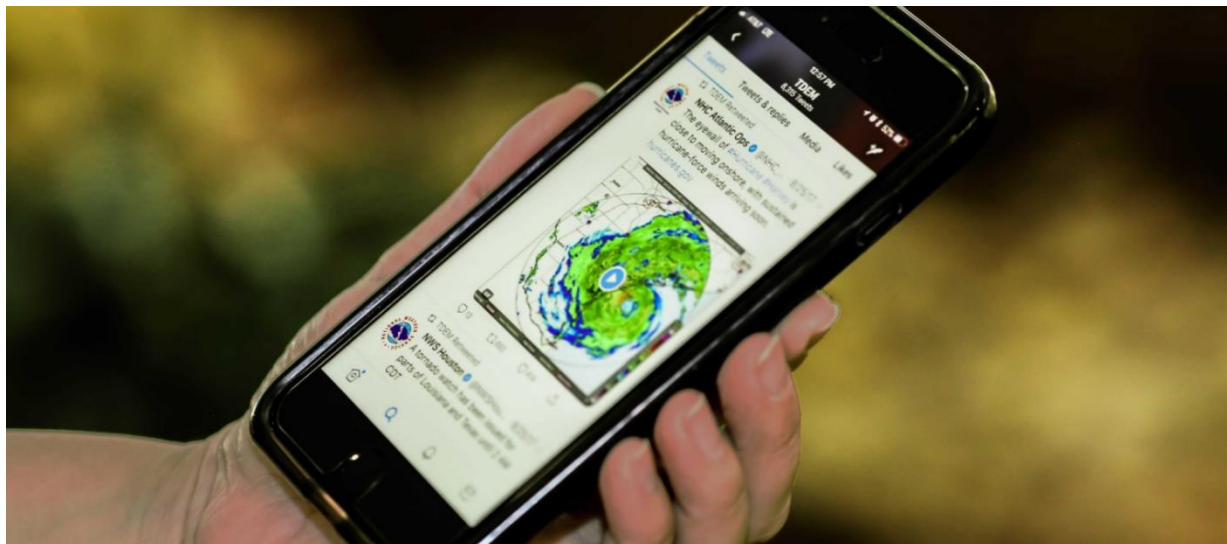

April 2018

The *Preparedness Update* alerts Texas' emergency management community to planning, training and exercise opportunities while providing updates on Texas Division of Emergency Management (TDEM) preparedness initiatives and activities. For more information, or to receive the *Preparedness Update*, contact [Bill Wahlgren](#).

## The Social Media Factor

Watch the Video [here](#)

In recent years, social media has become a critical information-sharing resource between public safety organizations and the communities they serve. With more people using social media as a main source of instant news and information, Facebook, Twitter and other social media platforms have become influential ways to communicate with the public before, during and after an incident or event. If a community feels it is not getting the information it needs from local officials, however, people may turn to unverified, unofficial sources. This can cause problems when the information is inaccurate. During Hurricane Harvey, rescue teams soon learned that many "shared" and re-tweeted rescue requests reached them after the rescue had been made by other responders. Also, social media posts fanned public fears in central and north Texas over a rumor that the hurricane had created a gas shortage. As motorists scrambled to fill up their gas tanks, long lines formed at many stations while other

People increasingly look to social media for immediate news and information.

stations soon ran out. This created an unnecessary emergency in the midst of a major disaster. Therefore, many public safety and emergency management organizations monitor and contribute critical information to social media platforms. For example, the Texas State Operations Center (SOC) uses a social media dashboard application to monitor multiple Twitter accounts simultaneously. The SOC pulls critical information from weather, media, emergency management and first responder Twitter accounts and sends it to the appropriate district coordinator (DC). The SOC then relies on the DC to follow up with information on the accuracy, severity and expanding nature of the incident. Information from the SOC also provides the DC with ongoing situational awareness of incidents in their areas. The SOC also manages the Texas Alerts Twitter account, which extends AMBER, Silver, Blue and Endangered Missing Persons alert notifications via social media. Statewide volunteer organizations such as the American Red Cross use social media to help manage donations and recruit volunteers by quickly generating accurate media coverage, responding to information requests and dialoging with the community. Social media provides a very powerful means of delivering information quickly, enabling coordination of actions and resources, as well as correcting misinformation and getting ahead of rumors. This new reality emphasizes the need to be proactive and embrace social media as a way to monitor the situation and keep the community informed. ## **Exercise Program Spotlight**

### **Emergency Management Preparedness Grant Exercise Credits**

The Emergency Management Preparedness Grant (EMPG) program is designed to assist state, local and tribal governments in developing and maintaining a self-sufficient and self-sustaining emergency management program. In order to receive a receipt for your EMPG exercise credits, you must use the following terminology in the subject line of the receipt request [email](#) that you submit:

- AAR *or* After-Action Report
- TEP *or* Training and Exercise Plan

### **TxTEP Calendar Highlights**

The Exercise Unit has created the Texas Training and Exercise Planning (TxTEP) cooperative to coordinate exercises with other state agencies. Please direct questions, updates or changes to the Exercise Unit at [tdem.exercises@dps.texas.gov](mailto:tdem.exercises@dps.texas.gov). Featured exercises for April:

- Texas Park and Wildlife "Cyberstorm 6" exercise, April 6
- CDC/Texas Department of State Health Services "Tranquil Terminus" full-scale exercise, April 9 - 13
- FEMA/Department of Energy "Pantex" full-scale exercise, April 17

## **Local and Regional Planning Update**

Each August, the State Operations Center (SOC) sends Texas jurisdictions the Threat and Hazard Identification and Risk Assessment (THIRA) and National Incident Management System (NIMS) survey. TDEM and the Office of Homeland Security use the THIRA and NIMS

survey results to assess the preparedness levels of jurisdictions around the state. THIRA is an all-hazards assessment tool that can be used by all jurisdictions. The National Incident Management System (NIMS) is a comprehensive, national approach to incident management that is applicable to all jurisdictional levels and across functional disciplines. It is important that all jurisdictions fill out the survey during the allotted two week period. This allows the SOC to form an accurate picture of the state's preparedness levels. For more information, contact [Rosemary McKnight](#). For additional questions or to comment, contact us at [tdem.plans@dps.texas.gov](mailto:tdem.plans@dps.texas.gov).

### **Local and Regional Plans Review**

In February, the unit reviewed **227** plan documents.

## **Drought Update**

While conditions have improved greatly in North and Southeast Texas, drought continues to worsen across much of the state, especially in the panhandle and into central Texas. Medium- to long-range forecasts indicate continued dry weather and worsening drought conditions. Consult the United States Drought Monitor for current drought conditions: <http://droughtmonitor.unl.edu/CurrentMap/StateDroughtMonitor.aspx?TX>. ## **Preparedness Quiz**

Determine whether each statement is *True* or *False*.

1. It is more difficult for people to hear messages during an emergency. Stress, change of routine, and lack of sleep all can be hurdles to overcome when communicating during emergencies.
2. A key decision in planning emergency communications is *how* you will get the message to the audience.
3. During an incident, the best way to reach the target audience is to plan for in-person events, such as briefings and public meetings.
4. Internet and social media provide a vehicle for quick, short messages but can be difficult to control once the message goes out.

### **A Fond Farewell**

This month we bid farewell to State Exercise Coordinator Esther Corwin. During her almost 16 years here, she taught and worked alongside thousands in the emergency management community. She will continue to work with local partners and jurisdictions at the Texas Department of State Health Services. We wish her the best of luck in her new career.

## Upcoming Preparedness Training Opportunities

### TDEM Brings the First FEMA Basic Academy to Texas

TDEM will offer the first two weeks of the L-101 Foundations of Emergency Management course this summer, which consists of 80 hours of Basic Academy credit requirements. To apply you must submit a [FEMA 119-25 form](#), along with all prerequisites and a signed [letter of commitment](#), to [Paul Hahn](#) as soon as possible. A committee will meet in May to select applicants. The Academy's final two weeks of instruction will be delivered at a later date, to be determined. For more information on the Basic Academy curriculum and its prerequisites, refer to FEMA's National Emergency Management Basic Academy [webpage](#).
