## Disaster Reimbursement – Keeping Ahead of Expenses

To watch the video, click on this [link](#).

When disaster strikes, it is essential that resources are available as soon as they are needed. The Sandy Recovery Improvement Act of 2013 amended Title IV of the Stafford Act and was put in place to reduce the costs and increase the flexibility of providing public assistance. Hurricane Harvey tested FEMA's new public assistance program, which uses a single point-of-contact for applicants and makes the funding process transparent. The [Grants Manager and Grants Portal Tool](#) offers web-based project tracking to help speed this process. Without proper planning, however, resources and assistance obtained under non-competitive circumstances can sometimes be priced much higher than what is considered normal. The "hurry up and get it done" mindset where the rules are ignored so that resources arrive as soon as possible can result in deobligation. This means your jurisdiction will probably not get reimbursed for goods and services if it cannot prove it received them. This, of course, could

Proper planning and resource tracking are fundamental for local jurisdictions.

cost the jurisdiction a great deal—perhaps even its entire annual budget. Jurisdictions receive resources from several entities such as the state, FEMA and donations. The documentation should be the same for any resource no matter the source or who is paying for it. Here are some tips jurisdictions can use to help stay ahead of expenses:

- Be aware of your county’s disaster financial threshold for [FEMA eligibility](#).
- Get three quotes from vendors.
- Track all resources that are sent to your jurisdiction.
- Always get a signature when goods are delivered.
- Have pre-disaster contracts with a scalability factor in place.

Tracking your jurisdiction’s expenses does not require special software to track labor and materials. Even a pad and pen will work as long as meticulous records are kept and signatures obtained for receipt of labor and goods, notes Quenya Evans, Emergency Finance Section Coordinator. Education and communication are key to ensuring that expenses are tracked properly. Local fire chiefs, police, finance personnel and county commissioners can contact the [Statewide Procurement Division](#) (SPD) for more useful information about procurement. TDEM offers free workshops on expense tracking and will travel to jurisdictions through its [Regional Disaster Finance Program](#). Education and planning go a long way in ensuring that expenses are tracked in an accurate and timely manner, which can help increase the chances of qualifying for a FEMA reimbursement. ## **Homeland Security Exercise and Evaluation Program**

TDEM's Exercise and Training units seek instructors for the Homeland Security Exercise and Evaluation Program (HSEEP) Course. If you are interested, please call the Exercise Unit at 512-424-2447 or the Training Unit at 512-424-2197.

## **TxTEP Calendar Highlights**

The Exercise Unit created the Texas Training and Exercise Planning (TxTEP) cooperative to coordinate exercises with other state agencies. Please direct updates or questions to the Exercise Unit at [tdem.exercises@dps.texas.gov](mailto:tdem.exercises@dps.texas.gov).

## **Local and Regional Planning Update**

On April 3-4, South Padre Island hosted the G-235A—Advanced Emergency Planning course with 35 individuals in attendance. The course is intended for elected officials, emergency management coordinators and planners, department heads, risk managers, operations officers and representatives of volunteer groups active in disasters. It provides opportunities for students to work as a team to create effective planning documents that meet state planning standards and to utilize the plans through tabletop exercises. The course will be offered in June in Austin and two more times in different parts of Texas later this year. For more information, contact [Mario Chapa](#).

## **Local and Regional Plans Review**

In March, the unit reviewed **180** plan documents.

## **Drought Update**

A wet spring has improved conditions in North and East Texas while the drought continues to worsen across much of the rest of the state, especially in the Panhandle and Rolling Plains regions. Medium- to long-range forecasts in general indicate continued dry weather and worsening drought conditions.

Consult the United States Drought Monitor for current drought conditions:

## **Hazards Unit Spotlight**

The Hazards Unit coordinates the state's effort to enhance the emergency preparedness and response capabilities of communities throughout Texas. Examples of hazards may include industrial pollution, nuclear radiation, toxic wastes, dam failures, transportation accidents, factory explosions, fires, and chemical spills. Hazards can occur as a result of a man-made incident or a natural hazard. The Hazards Unit is also responsible for hazardous materials response training. Examples of hazardous materials may include weapons of mass destruction, such as toxic chemicals, fuels, nuclear waste products and chemical, biological, radiological or nuclear weapons capable of a high order of destruction or causing mass casualties.

**Pantex Full-Scale Exercise:** Pantex, the nation’s only nuclear weapons assembly and disassembly plant, conducted a full-scale, full participation exercise on April 17 in Amarillo, Texas. The Department of Energy mandates and evaluates this exercise every three years. Please direct questions, updates or changes to the Hazards [Section Administrator](#).

## State of Texas Emergency Management Plan and Annex Updates

The State of Texas Emergency Management Plan (State Plan), which includes the Basic Plan, all emergency support function (ESF) annexes, and hazard annexes, has been posted to the [Preparing Texas](#) website.

Below is a list of each document within the State Plan and its current status. As plans are updated, the State and Federal Plans Unit will replace the old version in coordination with the Training Unit. For more information, contact [Josh Bryant](#).

## Preparedness Quiz

Determine whether each statement is *True* or *False*.

1. The resource management process can be separated into two parts: resource management as an element of preparedness, and resource management during an incident.
2. Your community can assume that having agreements in place guarantees resources.
3. Mutual aid and assistance agreements are usually documented in the resource management annex to an emergency operations plan.
4. During emergencies, unsolicited donations are always welcome, even when they consist of unsorted goods.

## Upcoming Preparedness Training Opportunities

### **TDEM Brings the First FEMA Basic Academy to Texas**

TDEM will offer the first two weeks of the L-101 Foundations of Emergency Management course this summer, which consists of 80 hours of Basic Academy credit requirements. To apply you must submit a [FEMA 119-25 form](#), along with all prerequisites and a signed [letter of commitment](#), to [Paul Hahn](#) as soon as possible. A committee will meet in May to select applicants. The Academy's final two weeks of instruction will be delivered at a later date, to be determined. For more information on the Basic Academy curriculum and its prerequisites, refer to FEMA's National Emergency Management Basic Academy [webpage](#).

## Training Calendar
